MHATT-CAT Color Scheme for Labeling Tools

Last updated: 9/11/03

Sector 7 has several tool-storage locations, with the long-term goal of having sets of commonly-used tools for each hutch or lab. This plan will be frustrated if no one ever puts tools away after using them, or dumps all the tools into some random chest. So please be courteous. The following color-scheme is used to identify the locations of some tools; colors are usually marked with electrical tape or Uni-Paint markers.

First, the **overriding exception**: **BLUE** should always correspond to metric Allen keys.

Color	Location
Yellow	7-ID-B hutch
Green	7-ID-C hutch
Orange	Dohn Arms' stash
Purple	Electronics Lab
